DETAILED ACTION

Note: This is in response to amendment filed 11/28/2007.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-8 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,984,243.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively subject matter claimed in the instant application such as at least one stent connected to graft material and a plurality of crimped sections disposed between the stent and the graft which would have been obvious in view of the relatively detailed subject matter of the patent claims.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/686,833

Art Unit: 3734

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3 and 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kugler et al. (U.S. 6,280,466) in view of Hess et al. (US 2001/0053931).

Kugler et al. discloses in figures 3B-5 and col. 14 thru col. 16, a plurality of stent segment (10,30,40) connecting to a biocompatible, high tensile strength, abrasion resistant, high durable thin-wall graft material (45) by at least one connector sutures (25); wherein the graft material comprises a plurality of preformed crimp sections (41) disposed between the plurality of stent segments; and wherein the graft material (45) as described in col. 15, lines 41-42, can be formed of Silky II Polydeck by Genzyme. Kugler et al does not specifically point out that graft material (45) can be made of spider dragline silk as recited by applicant.

However, Hess et al teaches that it is known in the art to have graft material (14) being formed form spider dragline silk. For this reason, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the Kugler et al graft material formed of spider dragline silk as taught by Hess et al in order to enhance an increased elastic modulus and moisture absorption factor which enables the prosthesis to thereby sustain tissue ingrowths thereon.

Response to Arguments

5. Applicant's arguments filed 11/28/2007 have been fully considered but they are not persuasive. Applicant's argument with respect to claim 1 has been considered but is most in view of the new ground(s) of rejection.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin T. Truong whose telephone number is 571-272-4705. The examiner can normally be reached on Monday-Thursday from 8:00 AM to 6:00 PM..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hayes can be reached on 571-272-4959. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
